<ul style="list-style-type: none"> • A life savior. Love him. • Complimented the class very well. where sometimes class was not as rigorous due to time constraints, andrea was very clear, careful and methodical. worked extra to give us extra material when he felt we were not comfortable with a topic. Did best possible in math camp, and continued to do well teaching recitations. • andrea is patient, clear, and makes an excellent effort to link recitations and lectures. • excellent! • Concepts are clearly explained and difficulty of problem sets are okay, workload is friendly compared to other courses. The professor is on point with regards to how these math problems relate to solving practical economic issues. • Andrea was simply fantastic. After having him teach us in math camp, he clearly is an incredible teacher. His ability to give clear and concise recitations made it easy to pick up anything we didn't fully understand from the lectures. • Andrea is a great TA. He really wants his students to understand the material and clearly prepares hard for every recitation. He is very open to questions, and does his best to SUPPLEMENT the lectures as much as possible with sample problems, while still covering the actual material that was covered in class as well. He is a really great TA.
